OSHS is a wholly owned subsidiary of Optum Holdings LLC, part of the UnitedHealth Group family of businesses. UnitedHealth Group is a leading, Fortune 6 health and well-being company serving more than 142 million individuals and operating in all 50 states, the District of Columbia, most U.S. territories, and more than 140 countries worldwide. UnitedHealth Group offers some of the nation's largest healthcare networks and healthcare delivery systems with nearly 1.4 million credentialed physicians and other healthcare providers and 6,500 hospitals and other facilities.

2.0 DETAILED EVENT PROCESS

OSHS has established processes for managing and executing events for large groups of patients in need of health care services at the same location, during the same time simultaneously at multiple locations across the country seven (7) days a week. OSHS typically supports events on military installations, drill halls and gymnasiums, however this model is flexible enough that testing events can be conducted in community centers, schools, hotels or even in more obscure locations such as parking lots or other locations where drive thru testing could occur.

As outlined below, OSHS would receive an event request to include the location and target number of individuals for testing, schedule and coordinate all event related activities, perform the event and collect data electronically and report results to individuals.

Exhibit 3: COVID-19 Testing Event Process Flow

OSHS can support up to 80 events at one time throughout the State of California. A team would consist of four members, one Event Oversight Administrator (EOA), one clinical staff member (i.e. NP, RN, LPN, Phlebotomist, MA), one non-clinical staff members and one security team member. As requested, some locations can include a medical interpreter. Each team would be able to complete, in a 12 hour day, 132 tests per site/day and could increase capacity if additional teams are added or requested at each site. OSHS Testing Events consist of three phases that need to be managed: pre-event, event, and post-event.

2.1 PRE-EVENT

Upon the State of California securing a testing location, a request can be submitted to OSHS via the Client Portal, email, or by telephone from a designated entity within the State of California, which has been deemed the County Point of Contact. Once the request is received, we immediately assign a Testing Event Coordinator who will manage the coordination details for the requested event. Our Testing Event Coordinators work with the State Event Point of Contact (POC) to ensure OSHS has all the information needed. Those details include:

- The event location—street address, building number, city, state, and ZIP Code

- Start and end dates of the event and start and end times for each event day
- Event POC and contact information including office and mobile phone numbers
- Confirmation of security, building maintenance, custodial services with the Event POC
- Confirmation of POC to send supplies and equipment to for set-up
- Identification and Registration of patients to receive services
- Site layout, electrical needs and internet connectivity
- Any other details required

Additionally, for those events in building, OSHS will be working with the State Event POC on how to limit how germs enter the facility; minimize chance of exposure/risk, implement movement controls and manage access and movement within the confines of the event location. To include:

- Lay-out and flow for the event to ensure 6-10 feet of social distancing for all patients as well as healthcare providers;
- Utilization of the entire building facility for completion of the medical and administrative portions of the event;
- Maintain social distancing and group requirements in accordance with the State, CDC and WHO guidelines; and
- Only allowing a set number of patients into the event areas at one time with the use of staging, sizing, staggering and focused movements throughout the event

Once the event is confirmed, Event Operations Center (EOC) Staffing Coordinators generate the order that details the required staff for each site, to include healthcare providers, administrative staff, medical interpreters (as needed) and security. Once the above event details are confirmed, an event can start within 72-96 hours.

Due to the fact that appropriate health officers will serve as referring licensed physicians, the EOC Staffing Coordinators will not communicate with the referring physician(s) with regards to identification and registration of patients for the events. OSHS will follow the State guidance at <https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Expanding-Access-to-Testing-Updated-Guidance-on-Prioritization-for-COVID-19-Testing.aspx> for eligibility criteria of attendees for testing events. In addition, OSHS will work with the point of contact within each County on groups of individuals to be tested in order to ensure that anyone that needs a test gets a test as indicated by the County. The EOC Staffing Coordinators are also responsible to ensure that the appropriate equipment and supplies are requested per the order. If necessary, our Travel Coordinators are responsible for arranging travel to ensure designated staff can get to their respective sites on time.

Scheduling. Once the event location, date and times are established, OSHS will work with the County on how best to reach out to eligible attendees, either via email, text or phone call advising they are able to schedule a time for receiving their test. The notification will direct the patient to create an account and log in to the OSHS secure patient portal, LHI.Care.

Once logged in, the patient will be presented with Testing Events in their area. After selecting a preferred testing location, the patient will choose a testing date and time. Available date and times are displayed based on open capacity. Capacity is predetermined for the event based on the staffing model and calculated daily throughput. Upon selection of the date and time, the patient will receive a confirmation of the scheduled testing appointment along with their unique Authorization Id to present at the test location.

The patient will also receive a testing appointment reminder prior to their scheduled test date, advising that they can see full appointment details in LHI.Care if necessary. For patients with no internet access they can contact our Medical Service Coordinators who will be able to confirm demographic and preferred contact method information as well as collect any insurance information. They will then register them for an event site as well as a date and time for an appointment.

At this time, it is assumed that all event attendees will have an appointment for their sample collection. If a patient does not have access to the internet, a toll free number will be offered to patients to allow them to contact OSHS who will complete the registration and appointment scheduling over the phone. At this time, "walk-in's" will not be allowed.

Specimen Collectors. OSHS maintains an experienced network of more than 29,000 health care professionals in all 50 U.S. states and territories, the District of Columbia, and Germany. This includes 400+ credentialed health care providers from California that we use primarily for mobile events in RHRP that can be utilized for specimen collection for this program. As an NCQA certified Credentials Verification Organization (CVO), OSHS has the experience, systems, and processes in place to ensure our providers meet the highest standards of quality.

Depending on the expected volume, we can expand these capabilities if necessary to meet increased demand. As a subsidiary of UnitedHealth Group, we can access additional networks of medical professionals and we can also work directly with the State of California to leverage local talent that could serve in either clinical or non-clinical roles.

Distribution Operations Center (DOC). From our work managing nearly 2,000 annual mobile group events for RHRP over the past 18 years, we have implemented world class logistics and shipping capabilities through our Distribution Operations Center (DOC). Our systems are integrated directly with FedEx web services, and our established relationship with FedEx provides us with their best available pricing (no other commercial or government entity receives better pricing from FedEx). We have negotiated pricing based on weight, not distance, eliminating the need for multiple warehouses and reducing shipping costs. As a major FedEx customer, we have a unique ZIP Code and warehouse at their Memphis hub, which allows for prioritized shipping over other customers. A single, centralized warehouse provides a secure, controlled environment, including certified cold-chain storage capabilities.

Our DOC will ensure any medical supplies, IT equipment, and administrative supplies (tents, tables, traffic cones, generators, signage etc.) are prepared, packaged, and shipped to the Testing Event sites.

Staff Training. Ahead of the event, all staff will be required to undergo training that will be conducted within an online training module. The training will include processes for collection/handling of specimens, rules for wearing PPE, donning and doffing PPE, and hand washing hygiene.

2.2 EVENT

The day prior to the event all set-up will be completed. The EOA will work with the State Event POC to further evaluate the accommodations and determine the event set-up to account for best event flow, privacy for providers, and sound-level monitoring. They will establish the best fit for the services being provided at the particular event and set up the tents, tables, chairs, privacy screens, signage, laptops, printers, and scanners depending on the type of event being offered.

During the event, our Event Oversight Administrator (EOA)/Leads at each site will ensure the administrative staff and HCPs perform all requested services required at each location. The EOA at each site will be the primary POC during the event. They will establish communication with the team, meet with them to address any concerns onsite, and manage the set-up process according to the event plan. The EOAs monitor the schedule, event flow, and timeliness of the services to ensure all requested testing is completed at the event. If any administrative or other issues arise regarding staffing, equipment malfunctions, training questions, or clinical questions, the EOA will be able to communicate with staff from the various OSHS supporting functions who are available on call 24x7 while events occur.

Each site will be configured to provide the maximum output of screenings while maintaining strict controls over protected health information (PHI), personally identifiable information (PII), infection control and patient and staff health and safety. Event attendees will be verified upon arrival to the testing location by administrative staff and then provide any additional PHI/PII necessary to complete the laboratory requisition for their specimen. Upon completion, the patient will proceed into the testing area where they will be greeted by event staff. Once the specimen is collected, the clinician will release the patient from the event, and then exit the testing location to store the collected specimen and replace their PPE based on encounter level. The clinician will then collect the next patient's specimen collection supplies and proceed to the testing location to greet them.

As part of our standard operating procedures, administrative staff and health care providers are instructed to use disposable wipes to routinely clean all frequently touched surfaces.

2.3 POST-EVENT

Daily, our EOAs manage specimen pick-up to the desired lab locations as depicted by the State of California, daily specimen completion numbers, the FedEx or other courier pick-up information, disinfecting, clean-up and daily staff departures. OSHS would recommend that the State Event POC coordinate for a deep cleaning of the site each evening. We will comply with all local, state, and Federal laws for disposing of medical waste and biohazardous materials. They will also manage communication with the State

of California and the OSHS Distribution Operations Center for additional supply requests as necessary.

Results Reporting: The data collected at the event is automatically uploaded and processed in MedNet to await the lab results. Upon receipt of the lab results, each patient will receive a notification via email, text or phone call advising them that their results are available. For all negative results, patients will be able to retrieve those results directly from LHI.Care if they opted into the email or text notifications. If they preferred a phone call, one of our Clinical Operations department team members will reach out with that testing notification.

For any positive results, a nurse in our Clinical Operations department and/or the reference laboratory will call the patient regarding the results and clinical care path as directed by the State of California. This information will then also be posted in LHI.Care for the patient to retrieve and review for discussion with their primary health care provider. All notifications will be made according to local, state, and federal guidelines and statutes.

Data Transmission: Additionally, all data collected and results received will be sent via data exchange to CalREDIE. Upon contract execution we will work with CalREDIE IT staff to establish interface as quickly as possible. Testing can start even before an interface is complete and data will be transmitted as soon as the interface passes testing from both our team and the CalREDIE team.

Our system, MedNet, allows flexibility in defining and implementing custom data schemes and formats such as extensible mark-up language (XML), HL7 EHR formats, flat file formats, Excel, and Access. It also provides various data exchange methodologies with configurable frequency and content to include bi-directional secure file-transfer protocol (FTP), secure web services, and web site data export. All data sent to CalREDIE will be provided in real time as updates are being confirmed in MedNet. This ensures that CalREDIE receives the most up-to-date information as quickly as possible. OSHS also provides secure access electronic documentation and reporting on an as needed basis through our Client Portal.

Claims Billing: Upon completion of the testing process, OSHS has the ability to bill patient's insurance carriers and/or provide this information directly to the State of California. OSHS will collect insurance information and bill the insurance directly for the cost of services.

Event Conclusion: Upon conclusion of the need for each testing site, our EOAs manage supplies and equipment packaging, removal and return, and facility/site restoration. The Distribution Center is responsible for managing post-event supplies processing; and our computer technicians are responsible for equipment re-inventory.

3.0 ALTERNATE DELIVERY MODEL – HYBRID STAFFING MODEL

The above event delivery model can be customized at each stage in order to support a collection site that is managed locally with resources from the State of California.

OSHS can also support a consulting arrangement site, whereby, we would complete all pre-event related activities as outlined above to include event coordination, local staffing arrangements with the State, scheduling, distribution and training. OSHS will be able to provide training to local staff that the State of California would use within this hybrid model.

Training will include, how the site will operate, use of technology on site as well as collection procedures that need to be followed. The training will be provided for both Administrative and Clinical roles.

In this model, OSHS would supply the Event Oversight Administrator who will be the primary POC during the event. They will establish communication with the local team, meet with them to address any concerns onsite, and manage the set-up process according to the event plan. The EOAs will be able to monitor the schedule, event flow, and timeliness of the services to ensure all requested testing is completed at the event. If any administrative or other issues arise regarding staffing, equipment malfunctions, training questions, or clinical questions, the EOA will be able to communicate with staff from the local health system or other local entity to resolve any issues onsite. The State of California would be fully and completely responsible for the acts and/or omissions of its own personnel (including the acts and/or omissions of any third party contractors and subcontractors and their employees) providing the services contemplated by this hybrid model. OSHS would assume no risk or liability for any work performed by non-OSHS staff, or any bodily injury or illness of any non-OSHS staff.

Dependent upon need, OSHS can manage the post event operations or turn those over to be managed locally.

4.0 TRANSITION

OSHS would advocate that while a service contract is being executed that implementation and process discussions are occurring in tandem in order to finalize all requirements to maximize go live time. Once all requirements as well as the contract is finalized, OSHS will be able to deliver services in the specified locations by the State of California starting on May 4, 2020.

5.0 QUALITY ASSURANCE

OSHS maintains International Organization for Standardization (ISO) 9001:2015 certification to ensure best business practices for quality assurance. To achieve the highest quality at all levels of the programs, OSHS places the utmost importance on meeting customer expectations and meeting required acceptable performance levels. We integrate quality throughout the program to most effectively achieve desired results. OSHS's quality control and quality assurance procedures ensure continuous management of, and compliance with, customer performance requirements.

Our Continuous Improvement Management System (CIMS) applies to all regulatory standards referenced within contractual standards and to all processes for the delivery of services as defined by OSHS's customers. To ensure processes are effective, standardized documents will continue to outline the criteria and methods used by employees. The sequence and interaction of major processes in the CIMS are further defined in documentation. The CIMS processes will support the approved Quality Policy and objectives, which are implemented, reviewed, and maintained to regulate the effectiveness of the CIMS.

Business Associate shall promptly remedy any violation of any provision of this Addendum and shall certify the same to the CDPH Privacy Officer in writing. The fact that CDPH inspects, or fails to inspect, or has the right to inspect, Business Associate's facilities, systems and procedures does not relieve Business Associate of its responsibility to comply with this Addendum, nor does CDPH's:

Attachment 1

G. CONTRACTS FUNDED BY THE FEDERAL GOVERNMENT

1. It is mutually understood between the parties that this Agreement may have been written before ascertaining the availability of congressional appropriation of funds, for the mutual benefit of both parties, in order to avoid program and fiscal delays, which would occur if the Contract were executed after that determination was made.
2. This Agreement is valid and enforceable only if sufficient funds are made available to the State by the United States Government for the current and/or subsequent years covered by this Agreement for the purposes of this program. In addition, this Agreement is subject to any additional restrictions, limitations, or conditions enacted by the Congress or any statute enacted by the Congress, which may affect the provisions, terms, or funding of this Agreement in any manner.
3. It is mutually agreed that if the Congress does not appropriate sufficient funds for the program, this Agreement shall be amended to reflect any reduction in funds.
